

ELECTRIC VEHICLES

If you have travelled in an electric vehicle that requires charging, unfortunately under our terms and conditions that you have agreed to, you are not permitted to charge it from the electric supply at the cottage.

Whilst we applaud your efforts to go green and are trying to do so ourselves, our risk assessment and therefore insurance do not allow us to offer this facility due to trailing wires across to the property and windows being unsecured and in addition, our wiring is not quite up to the job!

The cost of electricity also means that it is prohibitively high for us to offer charging of EV cars free of charge as we try to keep our prices as competitive as possible for all our guests. However, we are currently looking into grants that would enable us to provide a proper EV charger for the property. It would really help us if you could let us know if you have an electric car and would therefore be interested in using the charger.

However, the good news is there are charging points in the bus park opposite the Post Office.

Thank you for your understanding.
