

## **INTERNET AND ELECTRICITY SUPPLY**

### **WIFI**

There is unlimited wifi provided for your convenience - it is the Hedgehope Cottage connection and the code is

### **Enjoy-your-stay**

If the connection is not working, please try the standard fix of turning the router off and leave for ten seconds and turn it back on again. If this doesn't work, please give me a call so I can ring PlusNet to sort it out.

### **POWER CUTS**

The Island does suffer from occasional and lengthy power cuts. There are torches in the drawer of the dresser in the kitchen. Please do not use candles as they pose a fire risk and can damage walls and furniture.

There is a camping gas stove in the cupboard next to the fridge and a suitable kettle in the kitchen cupboard. If you familiarise yourself with where all this is in the light, you will know where to find it all in an emergency. Sometimes these items are moved by guests, so may not be in the cupboard described.

Please embrace these power cuts - it is the nature of living on the island and is beyond our control. We do receive notifications when there is a power cut and also receive updates on expected time the service will be returned. I will try to ensure these are forwarded to the mobile number used when making your booking.
